

FAQs

1. **Who is Your Space for?**

Your Space helps space and garage owners manage, sell and enforce parking.

2. **How do we make money?**

Your Space makes money through a revenue share, meaning we only make money when space owners do.

3. **Where does Your Space operate?**

As of now, we do pilot testing in Phnom Penh city.

4. **How much do I have to pay to find parking spaces in Your Space application?**

Nothing. Your Space is a free service, you only have to pay for your parking fee.

5. **What happens if someone is parked in the parking space I have booked through Your Space?**

When you book a parking space through Your Space, the person leasing that space is notified, at which point the leaser either accepts or declines your booking request. If the leaser accepts your booking request, they are paid the listed booking fee and are bound by Your Space's Terms of Service to honor that booking. Your Space takes a very strict position on Leasers who do not honor bookings and will deactivate any Leasers' accounts if they are not honoring bookings.

6. **What happens after I book a space?**

We will inform the owner of the space and automatically send you the full space address and any extra details.
